

Furlong Vision Correction Announces Upgrade to the Alcon Allegretto Refractive Surgery System

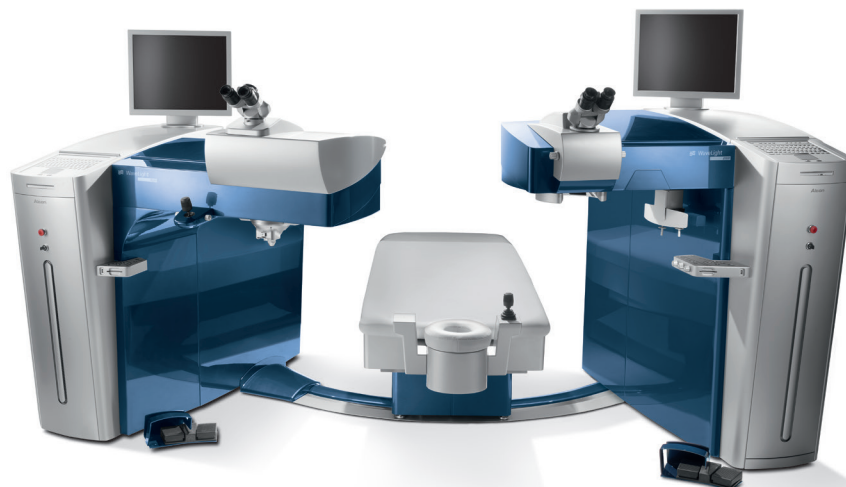

After careful evaluation of the current and future technology in the US pipeline, along with patient results with TLC centers, Furlong Vision Correction will be upgrading our excimer and femtosecond lasers to the Alcon Refractive Suite.

BENEFITS OF THE ALCON REFRACTIVE SUITE:

- Refractive outcomes for LASIK and PRK are equal or better than our current refractive technology outcomes
- Fastest refractive platform in the US
 - The WaveLight EX500 excimer laser treats a typical prescription of -5 diopters in 7 seconds.
 - The FS200 Femtosecond Laser enables flap creation in approximately 6 seconds.
- Improved patient comfort (less pressure with flap creation and faster procedure) and overall experience
 - Provides physicians with the opportunity to choose a highly customized, patient-specific treatment
 - Ensures a precise flap size and depth ensuring a properly re-aligned flap
- Widest treatment capabilities
 - Wavefront Optimized – Up to -12D myopia with a -6D astigmatism and a +6D hyperopia with a +5D astigmatism, 6 diopters of mixed astigmatism
- A variety of custom treatments are able to be performed
 - Custom Wavefront Optimized treatments
 - Custom Wavefront Guided treatments
 - Custom Topography Guided treatments – Coming Soon!
